DHEV SABHARISH

FULL STACK DEVELOPER

Chennai, India | dhev3518@gmail.com | 852-391-5959 | linkedin.com/in/dhev-s | github.com/dhevdotdev | dhev.dev

SUMMARY

Full Stack Developer with 2 years of experience and a strong foundation in Java, Spring Boot, and modern JavaScript frameworks like React. Experience developing scalable applications, implementing CI/CD pipelines, and managing cloud infrastructure on AWS. Leverages technology for operational excellence and continuously improves systems to drive business efficiency.

SKILLS

Languages & Frameworks: Java, Go, Spring Boot, JavaScript, TypeScript, React, HTML, CSS, Node.js

Cloud & DevOps: AWS (EC2, S3, EKS, RDS), Docker, Kubernetes, Git, Jenkins, Terraform

Data & Architecture: PostgreSQL, MongoDB, Kafka, RESTful APIs, Microservices, Database Design

WORK EXPERIENCE

Vegrow *Chennai, India*

Software Development Engineer II *Aug 2026 – Present*

Software Development Engineer I *Jun 2024 – Jul 2026*

- Led development of an internal procure-to-pay (P2P) platform for finance and operations, cutting manual reconciliation time by 40% and centralizing vendor, purchase, and payment flows (Go, Kafka, Zoho Books, TypeScript/Node.js, React)
- Built a unified OCR microservice (FastAPI, MongoDB, LLM providers) exposing a single document-processing API, consolidating 4+ duplicate OCR integrations across teams and cutting integration effort by 35%
- Planned and deployed reusable AWS pre-prod environments for dev/QA with Terraform and automation, reducing environment setup time from 3 days to under 2 hours and enabling 5+ teams to test features in parallel
- Implemented GitHub Actions CI/CD with self-hosted EKS runners and Docker/Kubernetes/Jenkins plus Playwright/Cypress, cutting median deployment time by 50% and becoming the go-to owner for new app pipelines
- Strengthened security and compliance by preparing logical access-control evidence and CloudTrail/Lambda alerts across 20+ production services, helping the organization pass CISA audits with zero major findings
- Rolled out Sentry and OpenTelemetry-based tracing and metrics, creating dashboards and training teams, which lowered MTTR for production incidents by 30% and avoided APM vendor lock-in

Samsung R&D Institute India – Bangalore (SRI-B) *Bangalore, India*

Software Engineering Intern – Magpie Intern 2023 *Jun 2023 – Aug 2023*

- Developed a React-based configuration system for the Voice Intelligence testing framework, building 8+ reusable form components that reduced manual configuration effort by approximately 60%

EDUCATION

College of Engineering Guindy, Anna University *Chennai, India*

Bachelor of Engineering in Computer Science — CGPA 9.43 *Nov 2020 – Jul 2024*

KEY ACHIEVEMENTS

- Co-author of the journal article "GBiL: A Hybrid GRU and BiLSTM Model with Particle Swarm Optimization for a Robust VANET IDS," published in *EURASIP Journal on Wireless Communications and Networking* (SpringerOpen, 2024)
- Received the Bravo "Best Employee of the Quarter" spot award twice consecutively within Vegrow's Tech and AI team for exceptional ownership and contribution to platform and infrastructure initiatives
